

Rain storage tank in modern wood look

GARANTIA Timber rainwater storage tank 230 l

Mediterranean, country house style, simple forms or rustic timber look - in garden design, the various architectural styles are increasingly being adopted. GARANTIA, the market leader for rainwater harvesting products, offers over 70 rainwater storage tanks in various designs, shapes, colors and sizes. The Timber rainwater storage tank 230 l is our newest addition

The Timber rainwater storage tank comes in a pleasing deep brown with a surface in a modern wood look. It is 93 cm high and holds 230 l. The lid can be removed for practical water removal and is closed with a childproof bayonet lock. The tank is equipped with two threaded connections: one is for mounting a tap, the second for water withdrawal with the optional universal hose set or for residual emptying before the frost period.

The rainwater storage tank is made of a high-quality synthetic material in Germany, which is weatherproof and UV-resistant. As an expression of its high quality, GARANTIA provides a five-year warranty.
