

## **Trendy slate look in the garden**

**GARANTIA is the trendsetter in the garden. The successful Ergo and Ergo Quadro raised bed systems are now offered in trendy gray 3D slate look Stone in addition to the familiar Wood 3D wood look. Slate is a current trend - as a decor of countertops, floor coverings, in facade design and now also in the garden.**

GARANTIA offers two variants: the square raised bed system Ergo Quadro Stone and the hexagonal raised bed system Ergo Stone. The two shapes can be combined with each other, offering a great variety of design options. No tools are needed to assemble the raised bed systems.

The basic set of the hexagonal raised bed system Ergo (110 x 95 cm) consists of six panels. An extension set with a length of 55 cm is also offered for expansion. The square alternative Ergo Quadro is available in three sizes: Ergo Quadro S (60 x 60 cm), Ergo Quadro M (60 x 80 cm) and Ergo Quadro L (80 x 80 cm), each with a height of 25 cm. The height of the Ergo raised bed system can be adjusted to the desired working height by combining several sets in 25 cm increments.

### **Optional growth zone and cold frame attachment**

For the Ergo raised bed systems Stone and Ergo Quadro Stone S, L and M, we offer matching Ergo growth modules which increase the incidence of light and heat and promote plant growth. The growth module for the Ergo raised bed system Stone Quadro M can also be combined with the cold frame attachment. The transparent lid protects the plants from the weather.

The plastic elements of the modular GARANTIA Ergo raised bed system Stone are UV-stable as well as weather-resistant. The

# Press release

panels are insensitive to moisture and, unlike wooden raised beds, do not require maintenance and painting.

The raised bed system is manufactured in Germany in an elaborate process entirely from recycled plastic. As an expression of high quality, the manufacturer provides a five-year warranty.
